

Coding & Implementation

Design-a working code-a maathradhu

Implementation na yenna?

Design document-a follow panni **actual code ezhudhradhu**. Nalla code = padikka easy, maintain panna easy, bugs kammi.

Development Flow

- **Step 1:** Task-a chinna pieces-a piringa.
- **Step 2:** Mudhal-la core feature ezhudhunga (MVP).
- **Step 3:** Ovvoru piece mudinjadhun test pannunga.
- **Step 4:** Git-la commit pannunga.
- **Step 5:** Adutha feature-ku pongal.

Clean Code Rules

Rule	Example
Meaningful names	userAge nu ezhudhunga, x nu illa.
Small functions	Oru function oru velai.
No repetition (DRY)	Same code repeat panna function aakkunga.
Comments	'Yen' nu vilakkanum, 'yenna' nu illa.
Consistent style	Indentation, naming ellaa idathulayum same.
Error handling	try / catch use pannunga.

Coding Standards

- Language-oda style guide follow pannunga (PEP 8 for Python).
- Input validation kandippa pannunga.
- Hard-coded values venaam, config use pannunga.
- Code review - innoruthar padichu check pannanum.

Development Approaches

Approach	Meaning
Frontend	User paakkura UI (HTML, CSS, JS, React).
Backend	Logic, database, APIs (Python, Java, Node).

Approach	Meaning
Integration	Frontend-um backend-um connect aagradhu.
